Green Associate Study Guide | LEED v4 — First Edition

CHAPTER | 1

1

Introductory conversations into sustainable design and construction and the associated benefits of the roles of the LEED AP and LEED rating systems

Introduction	1
About the Studio4 LEED Green Associate Study Guide	2
The Studio4 LEED Green Associate Study Guide Format	2
A Bit of Housekeeping	4
A Bit of Study Advice	5
Commentaries: the Value of LEED	5
Recommended Reference Links	5

CHAPTER | 2

11

An analysis between traditional design and construction practice versus green building strategies and the environmental impacts associated with each

Green Buildings and Communities	11
Green Building: Past, Present, Future	12
Green Building Core Principles	13
Traditional Thinking	13
Sustainable Thinking	14
Green Building Benefits	15
Economic Benefits	15
Social Benefits	15
Environmental Benefits	15
The Triple Bottom Line	16
Climate Change and Sustainable Communities	16
Green Building Costs	17
Hard Costs	17
Soft Costs	17
Life Cycle Costing	17
Value Engineering	17
Green Building Core Design Principles	18
The Sustainable Structure of Green Design	18
Integrated Design Approach	19
The Building Program	19
Design Flexibility for the Future	19
Location, Location, Location	20
Credit Interactions	21
Building Commissioning	21
Operations & Maintenance Program	22
Energy Audit	22

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

Green Codes	23
Green Building Incentive Strategies	23
The Smarter Approach	23
Chapter Recap	23
Recommended Reference Links	25

CHAPTER | 3

27

A review of the U.S. Green Building Council (USGBC), Green Building Certification Institute (GBCI), Leadership in Energy and Environmental Design (LEED) and the processes required for, and associated with, LEED certification

USGBC, GBCI & LEED	27
Introduction	28
U.S. Green Building Council (USGBC)	28
USGBC's Mission	28
USGBC's Vision	28
Green Building Certification Institute (GBCI)	29
Leadership in Energy and Environmental Design (LEED)	29
USGBC's Guiding Principles	30
The Goals of LEED	30
The Flexibility of LEED	30
The Benefits of LEED Certification	30
The Benefits of LEED Accreditation	30
Accreditation vs Certification	31
LEED Rating Systems	31
Rating System Organization	32
LEED for Building Design and Construction	33
LEED for Interior Design and Construction	33
LEED for Building Operations and Maintenance	33
LEED for Neighborhood Development	33
Choosing Between LEED Rating Systems	35
Multiple Certifications	36
LEED Reference Guides	36
Reference Guide Structure	36
Minimum Program Requirements (MPRs)	38
Impact Category and Point Allocation	38
Credit Harmonization	39
Credit Synergies and Trade-offs	39
LEED Pilot Credit Library	39
LEED Committees	39
Project Certification Process	40
Credit Interpretation Ruling (CIR)	44
LEED Interpretations	44

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

Alternative Compliance Path (ACP)	44
Global Alternative Compliance Paths (Global ACP)	44
LEED Credentialing & Credential Maintenance	44
USGBC Trademark Policy and GBCI Logo Guidelines	45
Recommended Reference Links	48

CHAPTER | 4

51

A review of the Integrative Design Process that gives teams an opportunity to be rewarded for holding charrettes, having a certain number of team meetings, conducting a thorough site assessment and having a LEED AP as a team member

Integrative Process (IP)	51
Integrative Process (IP) Credit Matrix	52
Integrative Process (IP) Overview	52
Integrative Process (IP) Prerequisite and Credit	53
Integrated Design Process	54
Holistic, Whole Building Design Objectives	55
Key Project Team Stakeholders and Disciplines	57
Design and Construction Phase Plan	58
Design Charrette	58
Credit Interactions	59
Building Commissioning	59
The Systems Thinking Approach	60
The Goal	60
Systems Thinking Approach	60
Systems Thinking	60
Systems	61
Leverage	66
Measuring Sustainable Building Performance	67
The Life Cycle Approach	67
Life Cycle Assessment (LCA)	67
Life Cycle Costing (LCC)	68
Externalities and the Environment	69
Planning for the End Game	69
Integrative Process (IP) Referenced Standards	71
Integrative Process (IP) Related Synergies and Trade-offs	71
Integrative Process (IP) Related Terms	71
Integrative Process (IP) Chapter Recap	71
Integrative Process (IP) Recommended Reference Links	73
Studio4 Project: IP Schematic Design Phase	74

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

CHAPTER | 5

77

The sustainable goals of the Location & Transportation category addresses the site location relative to existing infrastructure, services, and transportation

Location and Transportation (LT)	77
Location and Transportation (LT) Credit Matrix	78
Location and Transportation (LT) Overview	78
Location and Transportation (LT) Category Goals & Objectives	79
Location and Transportation (LT) Category Documentation/Cross-Cutting Issues	80
Location and Transportation (LT) Strategies	82
Site Assessment	82
Locate in a LEED for Neighborhood Development Location	82
Sensitive Land Protection	83
High Priority Site	84
Surrounding Density and Diverse Uses	84
Access to Quality Transit	86
Bicycle Facilities	86
Reduced Parking Footprint	88
Green Vehicles	89
Location and Transportation (LT) Triple Bottom Line	90
Location and Transportation (LT) Referenced Standards	91
Location and Transportation (LT) Related Synergies and Trade-offs	91
Location and Transportation (LT) Related Terms	91
Location and Transportation (LT) Chapter Recap	92
Location and Transportation (LT) Recommended Reference Links	95
Studio4 Project: LT Schematic Design Phase	96

CHAPTER | 6

101

The sustainable goals of the Sustainable Sites category addresses the development of and construction on the project site

Sustainable Sites (SS)	101
Sustainable Sites (SS) Credit Matrix	102
Sustainable Sites (SS) Overview	102
Sustainable Sites (SS) Category Goals & Objectives	103
Sustainable Sites (SS) Category Documentation/Cross-Cutting Issues	103
Sustainable Sites (SS) Strategies	104
Site Assessment	104
Construction Activity Pollution Prevention	105
Environmental Site Assessment (Schools and Healthcare)	105
Site Development—Protect or Restore Habitat	106
Open Space	106

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

Rainwater Management	107
Light Pollution Reduction	111
Site Master Plan (Schools only)	114
Joint Use of Facilities (Schools only)	114
Tenant Design and Construction Guidelines (Core and Shell only)	115
Places of Respite and Direct Exterior Access (Healthcare only)	115
Sustainable Sites (SS) Triple Bottom Line	116
Sustainable Sites (SS) Referenced Standards	117
Sustainable Sites (SS) Related Synergies and Trade-offs	117
Sustainable Sites (SS) Related Terms	117
Sustainable Sites (SS) Chapter Recap	118
Sustainable Sites (SS) Chapter Recommended Reference Links	121
Studio4 Project: SS Schematic Design Phase	122

CHAPTER | 7

127

The sustainable goals of the Water Efficiency category address the following areas: Indoor potable water reduction; outdoor potable water reduction; water efficiency as a teaching tool

Water Efficiency (WE)	127
Water Efficiency (WE) Credit Matrix	128
Water Efficiency (WE) Overview	128
Water Efficiency (WE) Category Goals & Objectives	129
Water Efficiency (WE) Category Documentation/Cross-Cutting Issues	130
Water Efficiency (WE) Strategies	130
Outdoor Water Use Reduction	130
Indoor Water Use Reduction	132
Fixture and Fitting Types	133
Cooling Tower Water Use	134
Metering Water Use	135
Water Efficiency (WE) Triple Bottom Line	137
Water Efficiency (WE) Referenced Standards	137
Water Efficiency (WE) Related Synergies and Trade-offs	138
Water Efficiency (WE) Related Terms	138
Water Efficiency (WE) Chapter Recap	139
Water Efficiency (WE) Recommended Reference Links	142
Studio4 Project: WE Schematic Design Phase	144

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

CHAPTER | 8

147

The sustainable goals of the Energy and Atmosphere category address the following areas:
reducing energy demand; increasing energy efficiency; managing refrigerants; renewable energy; ongoing energy performance

Energy and Atmosphere (EA)	147
Energy and Atmosphere (EA) Credit Matrix	148
Energy and Atmosphere (EA) Overview	148
Energy and Atmosphere (EA) Category Goals & Objectives	150
Energy and Atmosphere (EA) Category Documentation/Cross-Cutting Issues	150
Energy and Atmosphere (EA) Strategies	150
Designing the Building	150
Reducing Energy Demand	151
Passive and thermal design	151
Demand Response	151
Energy Audits, Assessments, and Monitoring	152
Increasing Energy Efficiency and Performance	154
Energy Simulation	154
Using Alternative Energy Sources	155
Renewable Energy Generation	156
Investing in Alternative Energy Sources	157
Managing Refrigerants	158
Ensuring Energy Efficiency and Ongoing Performance	160
Commissioning	160
Metering Energy Use	162
Building-Level Energy Metering	162
Advanced Energy Metering	162
Energy and Atmosphere (EA) Referenced Standards	163
Energy and Atmosphere (EA) Related Synergies and Trade-offs	164
Energy and Atmosphere (EA) Related Terms	164
Energy and Atmosphere (EA) Chapter Recap	166
Energy and Atmosphere (EA) Recommended Reference Links	169
Studio4 Project: EA Schematic Design Phase	171

CHAPTER | 9

175

The sustainable goals of the Materials and Resources category address the following areas:
sustainable construction and materials selection; waste management

Materials and Resources (MR)	175
Materials and Resources (MR) Credit Matrix	176
Materials and Resources (MR) Overview	176
The Stages of Waste Hierarchy	176

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

Life Cycle Thinking and Assessment	177
Materials and Resources (MR) Category Goals & Objectives	179
Materials and Resources (MR) Category Documentation/Cross-Cutting Issues	179
Materials and Resources (MR) Strategies	179
Designing the Building	180
Material Sourcing	181
Defining Sustainable Products and Materials	181
Furniture and Medical Furnishings (Healthcare only)	183
Design for Flexibility (Healthcare only)	183
Sustainable Purchasing Policies and Plans	183
Toxic Source Reduction (Healthcare only)	185
Materials and Resources (MR) Triple Bottom Line	186
Materials and Resources (MR) Referenced Standards	187
Materials and Resources (MR) Related Synergies and Trade-offs	187
Materials and Resources (MR) Related Terms	187
Materials and Resources (MR) Chapter Recap	189
Materials and Resources (MR) Recommended Reference Links	192
Studio4 Project: MR Schematic Design Phase	193

CHAPTER | 10

197

The sustainable goals of the Indoor Environmental Quality category address the following areas: indoor air quality; thermal comfort, lighting and acoustics

Indoor Environmental Quality (EQ)	197
Indoor Environmental Quality (EQ) Credit Matrix	198
Indoor Environmental Quality (EQ) Overview	198
Indoor Environmental Quality (EQ) Category Goals & Objectives	200
Indoor Environmental Quality (EQ) Category Documentation/Cross-Cutting Issues	200
Indoor Environmental Quality (EQ) Strategies	200
Designing the Building	201
Protecting the Building During Construction	201
Protecting the Building After Construction and Before Occupancy	201
Source Control	202
Low-Emitting Materials	202
Ventilation	203
Occupant Comfort	204
Thermal	204
Lighting	205
Daylight	206
Views	206
Acoustics	207
Occupant Comfort Survey	207

Table of Contents

Green Associate Study Guide | LEED v4 — First Edition

Green Cleaning and IPM Policies	207
Indoor Environmental Quality (EQ) Triple Bottom Line	207
Indoor Environmental Quality (EQ) Referenced Standards	208
Indoor Environmental Quality (EQ) Related Synergies and Trade-offs	208
Indoor Environmental Quality (EQ) Related Terms	209
Indoor Environmental Quality (EQ) Chapter Recap	210
Indoor Environmental Quality (EQ) Recommended Reference Links	214
Studio4 Project: EQ Schematic Design Phase	215
CHAPTER 11	219
The Innovation in Design credit category awards bonus points for projects that use new and innovative technologies and strategies to improve a building's performance	
Innovation (IN)	219
Innovation (IN) Credit Matrix	220
Innovation (IN) Overview	220
Innovation (IN) Category Goals & Objectives	221
Innovation (IN) Category Documentation/Cross-Cutting Issues	221
Innovation Descriptions	221
Innovation	221
Exemplary Performance	221
Innovation Strategies	221
Innovation (IN) Recommended Reference Links	222
Studio4 Project: IN Schematic Design Phase	223
CHAPTER 12	225
USGBC has identified environmental concerns that are important for every region of the country and offers bonus points for credits that address those regional priorities	
Regional Priority (RP)	225
Regional Priority (RP) Credit Matrix	226
Regional Priority (RP) Overview	226
Regional Priority (RP) Category Goals & Objectives	226
Regional Priority (RP) Category Documentation/Cross-Cutting Issues	226
Regional Priority (RP) Category Strategies	226
Regional Priority (RP) Recommended Reference Links	226
Studio4 Project: RP Schematic Design Phase	227

CHAPTER | 13

231

For professionals who support green building design, construction, and operations, the LEED Green Associate credential denotes basic knowledge of green building principles and practices, and LEED

LEED Green Associate Exam	231
Exam Overview	232
What you NEED to know	232
What you SHOULD know	232
General Codes	232
IP Category	234
LT Category	234
SS Category	235
WE Category	236
EA Category	237
MR Category	238
EQ Category	240
Exam Study Tips	241

CHAPTER | 14

243

Acronyms, abbreviations and definitions that may be unfamiliar or have specific meanings in the context of sustainability and green building

Acronyms and Glossary of Terms	243
Acronyms & Abbreviations	244
Glossary of Terms	251
Integrative Process (IP) Category	251
Location and Transportation (LT) Category	253
Sustainable Sites (SS) Category	259
Water Efficiency (WE) Category	262
Energy and Atmosphere (EA) Category	268
Materials and Resources (MR) Category	274
Indoor Environmental Quality (EQ) Category	283
